

STAPLE GLASS FIBER

Advantages:

- Reduces cracking
- Enhances impacts and abrasion resistance
- Produces excellent surface on formed face
- Reduces permeability and bleeding
- Controls plastic shrinkage cracks and restrains crack growth
- Consistent and uniform distribution throughout the concrete matrix
- Safe and easy to use

Applications:

- Driveways, sidewalks, airport runways
- Walls, box culverts, composite decks
- Decorative concrete
- Adhesives/construction works
- Applications which doesn't need permanent reinforcement.

Teknik Bilgi:

	SI
Tensile Strenght	3400 Mpa
Elasticity modulus	77 Gpa
Application temperatura	-60°C - +650°C
Melting Point	1120°C
Density	2,60gr/cm ³
Fiber diameter	13-15 micron
Fiber lenght	3-6-12 mm
